Epic	User	User Story ("As a User I want to ...")	Description
Authentication and profile management	Borrower	Register	The system shall allow a new user to create a personal account by providing the required personal information and completing email and phone verification. Borrower shall provide the country of their origination. first, middle and last name, DoB, email address, phone number, SSN, US address, set password, select communication preferences (SMS/email)
	Borrower	Verify email	As a part of registration flow the system shall ask the user to verify their email address through a one-time code/link sent to their email address
	Borrower	Verify phone number	As a part of registration flow the system shall ask the user to verify their phone number through a one-time code sent to their phone number
	User	Accept Terms and Privacy Policy	During registration the user shall acknowledge the Terms of Use and Privacy Policy
	User	Login with email and password	Includes 'Remember me' feature The system shall allow users to remain authenticated on trusted devices for a configurable period. Lock account after consequal unsuccessful attempts to login
	User	Logout	The system shall securely terminate the current user session.
	User	Reset password	The system shall allow users to reset forgotten passwords through a verification process (email).
	Borrower / Co-borrower	View profile	The user shall be able to review all their personal information stored in the system.

Epic	User	User Story ("As a User I want to ...")	Description
	Borrower / Co-borrower	Update profile	Approved Borrowers and Co-borrowers shall be able to update their contact information, including email address, phone number and mailing address. Updated information shall be used for borrower communication and servicing activities. When phone number/email are updated - the verification process should re-occur
	User	Change password	The system shall allow authenticated users to change their password.
	Admin / Underwriter / OPA Staff	View profile	Admin/underwriter shall be able to see in their profile their name and email
	User	Select the languge for interface	Select the interface language: English/Spanish
Users management	Admin	Create, change, delete admin/underwriter	Assuming that admin should provide name and email to create an admin/underwriter and then the sytem shall send an email to the new user that would allow them to set their password
	User	Set password	When a new user is registered, the system shall send them an email with a link that allows the user to set their password
	Admin / OPA Staff	View admin/underwriter	A simple list of users is assumed + search by name/email
	Admin / Underwriter / OPA Staff	View the list of borrower/co-borrowers	See a list of borrowers/co-borrowers. Assuming that main borrower info would be provided: name, email, phone number, address, state, application status (in progress/approved/declined) Assuming to display up to 8 columns
	Admin / Underwriter / OPA Staff	View borrower details	Admin/Underwriter shall be able to open a borrower profile and review all available borrower, co-borrower, application and loan information.
	Admin / Underwriter / OPA Staff	Search and filter borrowers/co-borrowers	Admin/underwrites shall be able to user search by name, email, phone number Admin/underwriter shall be able to filter by state and application status
	Admin / Underwriter	Manage borrower accounts	Admin/Underwriter shall be able to manually update borrower/co-borrower personal date (line name, email, address, etc.)

Epic	User	User Story ("As a User I want to ...")	Description
	Admin / Underwriter	Send/resend set password link	Admin shall be able to send set password link to any user Underwriter shall be able to send set password link to borrower/co-borrower
	Admin	Activate/inactivate user's account	Admin shall be able to withdrow and reinstantiate access to the system for any user
	Admin / Underwriter / OPA Staff	Add a borowwer to DO NOT LOAN list	Admin/underwrites shall be able to add potential borrowers to DO NOT loan lists
Loan Application	Borrower	Sign credit authorization, electronic disclosures and consent documents	The system shall dynamically generate the required credit authorization, electronic disclosures, consent forms and other application documents based on the borrower's state of residence and applicant role (Borrower / Co-borrower). The Borrower and Co-borrower shall be able to review and electronically sign the Credit Authorization and other application consents required to initiate the loan underwriting process. Electronic signature is performed using DocuSign. Different document packages are generated for Borrowers and Co-borrowers
	Borrower	Start a loan application	The system shall allow an authenticated borrower to start a new loan application. One active application per borrower is assumed.Or if the user is on the DO NOT lend list, the applicant is not allowed to create a new application If a user already has a loan application, the new application should not be allowed.

Epic	User	User Story ("As a User I want to ...")	Description
	Borrower	Pass Income verification	The borrower shall provide employment and income information required for loan processing: - provide the annual income - upload documents that prove the income (select document type and upload a document).
	Borrower	View loan information and select loan application details	The system shall present the loan information to the borrower. The borrowers should select their application details and confirm the application: - their USCIS application (single select from the list of predefined values) - the application type, which defines the size of the loan(single select from the list of predefined values)
	Borrower	Add a co-borrower and submit the application	The borrower shall be able to invite a co-borrower when required or desired. The following should be provide for a co-borrower: - first and last name - email The borrower shall submit the completed loan application for processing.
	Borrower	Provide debit card details	Borrower shall provide the details of a debit card details they own
	Borrower	Finish application process and review the next steps	The borrower should be able to: - see the confirmation of application submission - provide their household info (income, size), if they are veterans and select how they hert about OPA

Epic	User	User Story ("As a User I want to ...")	Description
	Borrower	View contact information	Borrower shall be able to access a static page with support contacts details (information only, no interactive elements)
	Co-borrower	Accept borrower invitation (registration throuth the invitation)	The system shall allow a co-borrower to create a personal account, if required, to securely access the assigned loan application and complete the required application steps. The invitation shall securely associate the co-borrower with the corresponding loan application.
	Co-borrower	Complete assigned application	The co-borrower shall provide all required personal and financial information associated with the borrower's application. Assuming that they should provide the same info as borrower
	Co-borrower	Sign credit authorization, electronic disclosures and consent documents	Same as borrower, co-borrower should sign all the required documents via electronic signature in DocuSign
	Co-borrower	Upload supporting documents to prove income and provide card details	The co-borrower shall upload all required supporting documents to prove their income. Co-borrower shall provide their debit card details
	Borrower / Co-borrower	Move back and force through the application process	After the account for a borrower/co-borrower is created, they should be able to return to the previous steps of their application process
	Borrower	Replace co-borrower	The Borrower shall be able to replace the invited co-borrower if the invitation expires, is not accepted within five days, or the co-borrower does not satisfy the underwriting requirements. The system shall send a new invitation to the replacement co-borrower. IF the co-borrower fails to meet underwriting requirements, system will be able to reset borrower application and allow new co-borrower to receive an inviation to apply. The system should notify the borrower that there are issues with co-borrowers (covered in Notifications epic)

Epic	User	User Story ("As a User I want to ...")	Description
Loan Decisioning	System	Verify borrower identity	The system shall verify the borrower's identity using the configured identity verification service (Instant ID). If identity verification fails, the loan decisioning should be stopped and the borrower should either update their data or leave. Identity verification happens on the first step, ~~before the account is created AND when personal data is updated.~~
	System	Perform NO LEND look up	They system shall verifiy that the applicant does not have an open application or loan, and it needs to check name and email against a legacy no lend list and internal system list of recent (6 months) denied application or default status.
	System	Perform OFAC screening	The system shall verify that the borrower is not listed on the OFAC sanctions list. If identity verification fails, ~~the loan decisioning should be paused and moved to manual review process.~~NO, user is unable to proceed, they receive a message to call customer service (the notification will be implemented as a separate user story).

Epic	User	User Story ("As a User I want to ...")	Description
	System	Perform credit check	The system shall retrieve the borrower's credit report and credit score. If credit check fails, the loan decisioning should be paused and moved to manual review process. Autmation rules to come. But if a credit score is lower than XXX then no manual review - application is denied and Adverse Action letter is sent. IF credit score is between XXX and XXX, then email is sent about requiring a co-borrower and co-borrower invite is sent. If credit score is above XXX then application can proceed automatically without human review. The application categorization and decisioning is done in story 'Determine loan eligibility' (line 52)
	System	Verify borrower / co-borrower income	The system shall verify if the borrower / co-borrower provided their income documents.
	System	Determine loan eligibility	The system shall evaluate the application against the configured business rules and determine the eligibility outcome: - The system shall automatically approve applications meeting all configured approval criteria. The borrower should be notified about the decision via SMS/Email - The sytem should push the application to require a co-borrower - The system should reject the application if the borrower does not match the conditions
	System	Determine co-borrower requirement	The system shall determine whether a co-borrower is required for the application. If a co-borrower is required, the system shall send co-borrower an invitation to the system

Epic	User	User Story ("As a User I want to ...")	Description
	System	Evaluate co-borrower eligibility	The system shall perform the same checks for a co-borrower as for a borrower if they are required: identity verification, credit check and income check
	System	Route application for manual review	The system shall route applications requiring manual review to the underwriting queue.
	Underwriter / OPA Staff	View application details	The Underwriter and OPA Staff shall be able to view the complete loan application, including borrower and co-borrower information, application status, selected USCIS service, submitted documents, verification results, decision status and other application-related information. Any underwriter can review any application
	Underwriter	Request additional information	Underwriter shall be able to request additional documents or information from the borrower. Assuming the underwriter should provide a text note with the required details
	Borrower	Submit additional information	Borrower shall be able to provide the requested documents or information and resubmit the application for review. Assumed that borrower should have an option to upload documents via the customer portal and add a text note.
	Underwriter	Approve application	Underwriter shall be able to manually approve an application. The borrower should be notified about the decision via SMS/Email
	Underwriter	Decline application	Underwriter shall be able to manually decline an application. The borrower should be notified about the decision via SMS/Email
	Underwriter	Override automated decision	Authorized Underwriters shall be able to override an automated approval or decline decision.

Epic	User	User Story ("As a User I want to ...")	Description
	Underwriter	Update the requested amount for the loan	The Underwriter shall be able to update the requested loan amount during the underwriting process to reflect the amount approved based on the applicant's creditworthiness, income verification, and internal lending policies. The system shall validate the updated amount, recalculate loan terms if applicable, record the change in the audit trail, and use the revised amount in subsequent loan approval and agreement generation processes.
Manage Loan	System	Generate loan agreement package	The system shall generate the complete loan document package after loan approval and send it for the electronic signature process.
	Borrower / Co-borrower	Review and sign loan agreement	The Borrower and Co-borrower shall be able to review and electronically sign all loan documents required after loan approval, including the Loan Agreement and other applicable disclosures before loan funding.
	Borrower/Co-borrower	View application status and details	The borrower shall be able to view the current application status (e.g. Submitted, Under Review, Pending action, Approved, declined) and view the application details.
	Borrower / Co-borrower	View application documents	Borrower shall be able to access all loan-related documents (download only, no in-app preview is assumed)
	Borrower	Withdraw application	The borrower shall be able to withdraw an application before the final loan decision is made.

Epic	User	User Story ("As a User I want to ...")	Description
	System	Issue virtual payment card	The system shall request issuance of a prepaid virtual card for the approved borrower.
	Borrower	View virtual card details	Borrower shall be able to securely access the issued virtual payment card information. Only the Borrower can access the virtual payment card. Co-borrower has no access to card information.
	Borrower / Co-borrower	View loan details	Borrower shall be able to review loan amount, remaining unused balance, APR, repayment terms and schedule.
	Borrower	Cancel loan before funding	Borrower shall be able to cancel an approved loan before the virtual payment card has been used.
	Admin / Underwriter / OPA Staff	View loan details	Internal users shall be able to review all loan information, funding status and related documents.
	Admin / Underwriter	Update loan details	Authorized users shall be able to manually update loan details (add documents, comments).
Manage Payments	System	Generate payment schedule for approved loan	Repayment Schedule is automatically generated when the loan is funded. Loan repayment begins within 45 days after the loan is approved, with payments due on the 1st of each month.
	Borrower / Co-borrower	View repayment schedule	Borrower/co-borrower shall be able to view the repayment schedule including: - due dates - amount to pay - if a payment was completed - if a payment is overdue
	Borrower / Co-borrower	View outstanding balance	Borrower/co-borrower shall be able to review the current outstanding loan balance.
	Borrower / Co-borrower	View payment history	Borrower/co-borrower shall be able to review all completed, pending, failed, refunded and reversed payment transactions.

Epic	User	User Story ("As a User I want to ...")	Description
	Borrower / Co-borrower	Make a scheduled payment via card	Borrower/co-borrower shall be able to make a scheduled loan payment.
	Borrower / Co-borrower	Make an additional payment via card	Borrower/co-borrower shall be able to make an additional (catch-up or extra) payment at any time. Borrower/co-borrower shall be able to repay the outstanding loan balance before the scheduled maturity date.
	Borrower / Co-borrower	View a card saved to make a re-payment	The Borrower/Co-borrower shall be able to view their debit card saved as a repayment method, including masked card details, card brand, expiration date, and whether the card is currently used as the active repayment method.They cannot see each others card information. Borrower/Co-borrower should see only the cards that the current user added
	Borrower / Co-borrower	Update payment method (card)	Borrower/co-borrower shall be able to update the payment method (card) used for loan repayment. Changes to debit card would need to be verfied by Repay (old card should be removed and the new card should to pass the same flow of as when adding a card for the first time)
	System	Apply late payment fees	The system should calculate and apply late payment fees. - If a monthly payment is not received within 15 calendar days after the due date, a late fee will be charged on the 16th day. The late fee will be $5.00 or 5% of the unpaid installment amount, whichever is less. Only one late fee will be charged for each missed payment. - If an account is more than 90 days past due, it will be considered in default. When this happens, the full past due balance must be paid within 30 days to avoid loan acceleration. - If an account is more than 120 days past due, the loan will be accelerated. When this happens, the full remaining loan balance including interest and outstanding fees must be paid within 30 days of receiving a notice of default. The APR remains at 1%.
	Borrower / Co-borrower	View late payment fees	Borrower/co-borrower shall be able to review applied late fees and overdue payment information.
	System	Track payment status	The system shall update the status of payment (succedeed, failed, reversed) based on the status received from Repay
	Borrower / Co-borrower	View payment result	The Borrower/Co-borrower shall be able to view the status of each payment transaction, including successful, pending, failed, refunded and reversed payments.
	Borrower / Co-borrower	Make another attempt to pay if payment fails	If a payment failed or was reversed, borrower should be able to make another attempt to make a payment

Epic	User	User Story ("As a User I want to ...")	Description
	Admin / Underwriter / OPA Staff	View repayment schedule	Underwriter shall be able to view the repayment schedule including: - due dates - amount to pay - if a payment was completed - if a payment is overdue - any fees applied
	Admin / Underwriter / OPA Staff	View payment history	Underwriter shall be able to review all completed, pending, failed, refunded and reversed payment transactions.
	System	Process reversed or refunded payments	The system shall process reversed or refunded payment transactions and automatically update the loan balance, payment history and outstanding amount accordingly.
Notifications & Communications	Borrower / Co-borrower	Receive Application approved notification	
	Borrower / Co-borrower	Receive Application declined notification	
	Borrower / Co-borrower	Receive request for additional information	Borrower shall receive a notification when additional information or documents are requested.
	Borrower / Co-borrower	Receive document signing request	The system shall notify users when documents are ready for electronic signature.

Epic	User	User Story ("As a User I want to ...")	Description
	Borrower	Receive notification that the co-borrower invitation has expired	The Borrower shall be notified when the invited Co-borrower's invitation expires without being accepted within the configured validity period. The notification shall inform the Borrower that a replacement Co-borrower can be invited to continue the loan application process.
	Borrower	Receive notification that the co-borrower did not pass underwriting	The Borrower shall be notified when the invited Co-borrower does not satisfy the underwriting requirements. The notification shall inform the Borrower that another Co-borrower may be invited to continue the application process.
	Borrower	Receive loan funding notification	Borrower shall receive confirmation when the loan has been funded and the Virtual Payment Card is available.
	Borrower	Receive payment reminders	Borrower shall receive payment reminders before upcoming payment due dates.
	Borrower	Receive payment confirmation	Borrower shall receive confirmation after successful payment processing.
	Borrower	Receive payment failed notification	Borrower shall receive confirmation after failed payment processing.
	Borrower	Receive delinquency notifications	Borrower shall receive notifications about overdue payments, late fees, default status and loan acceleration.
	Admin / Underwriter	Receive system task notifications	Internal users shall receive notifications about applications assigned for manual review or additional processing.
	User	Manage notification preferences	Users shall be able to manage their preferred communication channels.
	System	Notify OPA Staff about application processing failures	The system shall notify OPA Staff when a technical failure prevents an application from progressing after the borrower account has been created.
	System	Receive unable-to-proceed notification	The Borrower / Co-borrower shall receive a notification when they are unable to proceed with the loan application due to an unsuccessful identity verification or sanctions screening. The notification shall instruct the user to contact Customer Service and shall not disclose sensitive verification or screening details.
Reporting & Audit	Admin / Underwriter / OPA Staff	Export credit report	Export report in xlsx/csv format

Epic	User	User Story ("As a User I want to ...")	Description
	Admin / Underwriter / OPA Staff	Export Monthly consumer credit reporting	Export report in xlsx/csv format
	Admin / OPA Staff	Export application data	Export list of applications in xlsx/csv
	System	Send credit report to Equifax	
	System	Send consumer credit reporting (Metro II) to Equifax	
Integrations	System	Integrate with Instant ID to Verify borrower identity / LexisNexis	The system shall integrate with LexisNexis InstantID to perform borrower identity verification and OFAC screening.
	System	Integratewe with Equifx to retrieve credit report	The system shall integrate with Equifax to retrieve borrower credit reports and credit scores.
	System	Integrate with DocuSign	The system shall integrate with DocuSign to electronically sign application and loan documents.
	System	Integrate with Communication Provider (Twilio / SendGrid)	The system shall integrate with the configured communication provider to deliver email and SMS notifications.
	System	Integrate with Repay Payment Gateway	The system shall integrate with Repay to collect and tokenize borrower / co-borrower debit card information during the loan application process and to support subsequent loan repayment transactions. The integration shall support payment processing, payment status updates, refunds, reversals and synchronization of transaction results.
	System	Integrate with USIO Virtual Card Service	The system shall integrate with USIO to issue Virtual Payment Cards for approved borrowers.
	System	Integrate with Equifax Payment Reporting Service	The system shall report borrower payment activity to Equifax according to the required reporting schedule.
	System	Authenticate internal users	The system shall integrate with Microsoft Entra ID to authenticate internal users.
	System	Exchange data with Microsoft Fabric	The system shall exchange operational data with Microsoft Fabric for reporting and analytics purposes.

Epic	User	User Story ("As a User I want to ...")	Description
Acquisition Channels, Referrals & Campaign Management	Admin	Manage Acquisition Sources	The Admin shall be able to create, view, update, and maintain acquisition sources used to classify and track loan acquisition.
	Admin	Manage Referral Partners and Partner Groups	The Admin shall be able to create, view, update, and maintain referral partners and partner groups used for loan acquisition management.
	Admin	Manage Marketing Campaigns	The Admin shall be able to create, view, update, and maintain marketing campaigns associated with loan acquisition activities.
	System	Associate Loans with Acquisition Information	The system shall associate each loan with the corresponding acquisition source, referral partner, partner group, and marketing campaign to support tracking and reporting.
	Admin/Underwriter	View Acquisition Information for Loans	Authorized internal users shall be able to view acquisition information associated with a loan.
	Admin/Underwriter	Search Loans by Acquisition Attributes	Authorized internal users shall be able to search and filter loans using acquisition-related information.
	Admin/Underwriter	Analyze Lending Performance by Acquisition Channel	Authorized internal users shall be able to analyze lending performance by campaign, partner group, referral partner, and acquisition source via creating credit report / consumer credit report for a specific campaign / partner/ aquisition channel.

Identity verification is performed before initiating a credit inquiry to minimize external credit bureau costs. LexisNexis InstantID is assumed as the identity verification provider. If a technical failure occurs after the borrower account has been created, the application shall remain in its current state, OPA Staff shall be notified, and the borrower shall be able to resume the application from the point where the failure occurred once the issue is resolved. Applicant would need to create an account to be able to resume. What is solution? - The description was updated. The account should be created before the Identity verification is passed.	1	3	4	1	2	1	2	8	10	6	8
	1	1	2	0	0	0	0	12	14	3	4
OFAC screening is performed as part of the identity verification process through the LexisNexis InstantID integration. If the user fails to pass the check - the flow assumed to be finished. The user receives a notification to contact customer service (the notification will be implemented as a separate user story)	1	1	2	0	0	1	2	5	6	6	8

Credit report is requested only after successful identity verification. Equifax is assumed as the credit bureau provider. Hard credit inquiry is performed. Technical failures during credit check shall not cause the application to be rejected. The application shall be resumed after the issue is resolved.	1	4	6	1	1	1	1	8	9	6	8
Manual or automated document analysis via OCR is an mandatory capability. The objective is to verify the existence of an income source rather than calculate or validate income amount. Technical failures during income verification shall suspend the verification process without losing application data. The application shall resume from the point of interruption after the issue is resolved.	1	6	8	0	0	1	1	14	16	4	6
Eligibility rules are preconfigured in the code and not configurable. Assuming that there are no 5-6 criteria that are evaluated for decisioning and all the rules are already defined.	1	6	8	0	0	0	0	18	20	8	12
Co-borrower requirement is determined automatically based on configured in the code business rules. UX/UI: Assuming email template might be needed	1	3	4	1	1	2	3	5	6	3	4
